OVERVIEW

2-days (12 hours) learning program for professionals that offers practical insights into complete Lifecycle of a sustainable project.

THIS COURSE IS FOR YOU IF

- You are an architect, engineer, or professional working within the built environment and need understanding of the sustainable buildings, materials & site management
- You are a student or working professional but do not have the exposure to real site issues
- You are a faculty and need to know the practical details of the full lifecycle of a project, from Site management to Structural details
- You are looking to start your own practice, shift career path or broaden your skills set within the same role

YOU WILL WALK AWAY WITH

1

The confidence to argue the business case for sustainability informed by a comprehensive understanding of the technical aspects

2

An action plan for integrating all the construction detailing with the help of the software techniques to ensure long-term value creation

3

The skills and knowledge to apply design, innovation and leadership competencies within your team/organisation

4
